

INNOVATIVE APPROACHES FOR  
PUBLIC AGENCIES

H A S K E L L

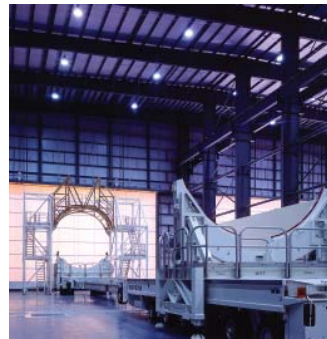

## GOVERNMENT SOLUTIONS

The demands on today's government institutions are greater than ever. Haskell can make it easier to handle those demands with well thought-out solutions. From roads, parks and water plants to courthouses, community centers and research facilities; Haskell works hard every day to help meet the public needs.

Hundreds of facilities have been delivered to local, state and federal government agencies within a defined timeframe and budget. Repeat business from such agencies as NASA,

USPS, FDMS, FDOT, and FDOC, as well as communities including Jacksonville Beach, Pembroke Pines, Cape Coral and The Villages are evidence of Haskell's promise to achieve the intended outcome.

Public agencies are often faced with extraordinary growth, aging facilities and inadequate funding. Haskell can provide new and innovative approaches to these public agency dilemmas. The Haskell team can deliver a solution that's everything you've imagined and more!

// We could not have asked for a better company to construct our buildings. They are beautiful, functional and were constructed within budget by a company that always displayed that they cared about us. //

George D. Forbes  
Jacksonville Beach  
Former City Manager

## FAST-TRACKED FACILITIES WITHOUT COMPROMISING QUALITY

- City Halls
- Community Centers
- Courthouses
- Emergency Operations
- Fire/Police Facilities
- Jails/Prisons
- Judicial Complexes
- Laboratories/Research Facilities
- Libraries
- Local/Federal Office Complexes
- Parks
- Port Improvements
- Transportation Facilities
- Roadways/Bridges
- Water/Wastewater Facilities

## SERVICES

- Design-Build
- Construction Management
- Architecture
- Engineering
- Construction
- Constructability Analysis
- Site Selection/Feasibility
- Facilities Management
- Equipment Setting/Installation
- Interior Design
