COMMUNITY HOSPITALS

GROUP PRACTICE FACILITIES

## ONE TEAM. ONE MISSION.

We're in the business of serving people, just as you are. We understand your mission to provide high-quality healthcare while maximizing your resources.

Whether replacing existing facilities or building a new one, our people and processes will help you balance the demands of creating new facilities with your goal to deliver uninterrupted patient care. A single point of contact through every phase of planning, design, and construction allows us to provide responsive and personal service. Behind the scenes, an expert team manages

scheduling, costs, quality and safety with an unwavering regard for the needs of your business.

For more than four decades, Haskell has built a reputation for excellence in healthcare projects across the nation, with the majority of our clients returning to us for additional work. Everyone involved with your healthcare facility project – from business planners, feasibility analysts, site and facility planners, to architects, engineers, construction professionals and support staff – recognizes that the end result of our work is to support your mission of caring,

## COMPLETE SOLUTIONS FOR QUALITY HEALTHCARE

Strong team relationships and superior customer service are the foundations for successful projects. This focus on service helps ensure a more seamless experience for clients throughout the complex planning, design and construction process.
